

ADVANCE YOUR NURSING CAREER WITH CGRN CERTIFICATION

Demonstrate your commitment to your profession and accelerate your career growth with CGRN certification, available exclusively to registered nurses (RNs) currently engaged in GI/endoscopy.

BENEFITS OF CERTIFICATION

- Expand your role in providing patient services
- Improve patient care
- Enhance your professional status
- Increase your earning power
- Achieve greater satisfaction in your chosen profession

BECOMING CERTIFIED

The ABCGN certification exam is administered twice annually (spring and fall).

To qualify for certification or recertification, candidates must meet the following criteria:

- Work experience must be as an RN (i.e., an LPN who has become an RN must have two years experience as an RN prior to sitting for the CGRN designation regardless of the number of years of GI experience as an LPN.)
- Full-time industry nurses whose focus is at least 40% clinical practice, education, or research are eligible. Those whose focus is sales are not.

An RN who passes the exam has demonstrated an expertise in GI and can proudly use the credential CGRN after her or his name. ABCGN provides all CGRNs with a digital badge they can use to promote their success. To learn more, visit abcgn.org/Certify/DigitalBadge

To apply for the exam and view exam study tips and advice, visit the ABCGN Certification Center at www.abcgn.org.

RETAKING THE EXAM

The Quest for Success program allows individuals to continue on their journey for CGRN certification, by allowing participants to take the exam a second time at a deeply reduced rate.
