## PROFESSIONAL PROFILE

- Compassionate and caring nursing professional committed to delivering high quality patient care, while collaborating with other medical professionals effectively.
- Reliable team player highly efficient at multitasking, accustomed to maintaining high productivity level with heavy workloads.
- Hard worker with the ability to learn new information and techniques quickly.

## WORK EXPERIENCE

**NYU Langone Health Long Island, Mineola, NY July 2021-present**

**Senior Staff Registered Nurse**

- Deliver comprehensive nursing care to patients, focusing on both pre-op assessment and intra-op support.
- Prepare patients for endoscopic procedures by conducting assessments, verifying medical history, obtaining consent, and providing pre-procedure education.
- Assist physicians during diagnostic and therapeutic endoscopic procedures, ensuring safety, comfort and procedural outcomes.
- Monitor patients under sedation, manage vital signs, and respond swiftly to complications and emergencies.

**Queens Endoscopy, ASC; Fresh Meadows, NY; July 2016- July 2021**

**Charge Nurse**

- Responsible for supervising clinical and non-clinical staff in a fast-paced environment; and maintaining an efficient patient flow.
- Participates in evaluation of staff performance and the orientation of new staff.
- Collaborates with Clinical Coordinator and Nurse Manager to obtain QAPI data.
- Works in cooperation with interdisciplinary team to ensure the quality of patient care.
- Conducts thorough health assessments prior to procedures, communicating any irregularities or significant findings to surgeons and anesthesiologists.
- Provides post-op care, implementing the necessary interventions for pain, significant changes in vital signs, etc.
